

**\*\*\*CAPE SYSTEMS AND OPEN TERRA \*\*\*  
ANNOUNCE NEW RELATIONSHIP WITH NOVELL**

**\*\*\*Combined Effort in RFID, Mobility and Supply Chain Optimization\*\*\***

**South Plainfield, New Jersey (February 28, 2006) – CAPE Systems Group, Inc.,** a leading provider of software technology for packaging design, pallet optimization, inventory and warehouse management, supply chain execution and order fulfilment, and Open Terra, a leading provider of wireless mobile platform technologies today jointly announced that they are establishing a strategic relationship to deliver solutions to customers using CAPE's supply chain execution software optimized on Novell's SUSE Linux Enterprise Server operating system and integrating Novell's security and identity management solutions with CAPE's RFID based asset tracking software.

The rapidly emerging needs of the Manufacturing, Distribution, Retail and Health Care industries will be a particular focus. In this regard, CAPE's RFID Test and Integration Center will showcase joint solutions based on the combined technologies of the contributing partners.

"As RFID technology matures and adoption increases, vast amounts of data will be captured and made available to line managers, warehouse workers, sales personnel and others as products move through the supply chain," said Richard Whitehead, director of product marketing for security and identity solutions at Novell. "Identity management solutions ensure the right people have access to the right data - ultimately streamlining business processes and securing sensitive information. Working with Cape Systems and Open Terra, customers can leverage the flexibility and stability of Novell's open source platforms and highly scalable security and identity solutions to address these emerging business challenges."

Nicholas Toms, CAPE's CEO, stated, "Through this relationship with Novell, we will now be able to provide enterprise level supply chain execution solutions optimized to run on SUSE Linux Enterprise Server, and to offer all the benefits of this leading open enterprise software to our mutual customers. In addition, by marrying Novell's world class identity management solutions with our own RFID asset tracking technologies, we can provide a host of new, needed applications to match people with their appropriate products in select vertical markets."

Ted Bielenda, CTO of Open Terra, stated, "We are very pleased to have Novell join us as we bring real-world, proven technology solutions to RFID, mobility and supply chain challenges. By bringing together Novell's powerful enterprise class infrastructure software and services, along with CAPE's supply chain and RFID enabling technologies and our own advanced mobility products, we are creating the most powerful and technologically advanced solutions in the marketplace today, which are exactly what our combined customers are looking for."

**About CAPE Systems**

CAPE Systems is an international provider of supply chain management technologies. CAPE Systems offers a comprehensive range of software systems and tools, from packaging and pallet optimization software, RFID asset tracking, to integrated warehouse and inventory management solutions, pick-to-light systems, and transportation management systems for enterprise wide and collaborative supply chain optimization.
