

***** SOCO SYSTEM AND CAPE SYSTEMS***
ANNOUNCE NEW DEVELOPMENT RELATIONSHIP**

*****Combined Effort Directed To Enhance
End-of-line Packaging And Handling Solutions*****

South Plainfield, New Jersey and Taastrup, Denmark (September 14, 2006) – CAPE Systems Group, Inc., (OTCBB:CYSG) a leading provider of software technology for packaging design, pallet optimization, inventory and warehouse management, supply chain execution and order fulfilment, and **SOCO SYSTEM** A/S of Denmark, a leading manufacturer of end-of-line packaging, palletizing and material handling equipment, today jointly announced that they are establishing a strategic development relationship to deliver enhanced solutions to customers using **CAPE's** pallet mapping software optimized on **SOCO SYSTEMS's** state-of-the-art robotic packaging and pallet building solutions together with **CAPE's** RFID based asset tracking software.

The rapidly emerging needs of the Manufacturing, Distribution, Retail and Health Care industries will be a particular focus.

Jesper Olesen, IT Manager of **SOCO SYSTEM** stated, "We have known CAPE Systems for many years and used, recommended and sold their pallet optimisation software with many of our solutions installed world-wide. What we are now seeking is a deeper integration of specific pallet mapping functions to be embedded as standard options into the man&machine interface of our pallet loading equipment. Furthermore we see a lot of perspective in extended efforts to align our end-of-line mechanical equipment and solutions with other key capabilities of the extensive CAPE Systems suite of supply chain applications."

Peter Ayling, CAPE's head of International Marketing, stated, "Through this relationship with **SOCO**, we will now be able to provide enterprise level supply chain execution solutions optimized to run on **SOCO's** state-of- the-art integrated robotic packaging and pallet building systems to our mutual customers. In addition, by setting up **SOCO's** world class end-of-line solutions with our own RFID asset tracking technologies, we can provide a host of new, needed applications to select vertical markets."

About Soco System

SOCO SYSTEM helps companies world-wide to realise a rational, effective and ergonomic end-of-line packaging and handling workflow. **SOCO SYSTEM** develops, manufactures and markets a broad, modular based product range of end-of-line packaging and handling equipment. The end-of-line product range covers the functions of carton erecting, pick & place, sealing, conveying, palletising and pallet stretch-wrapping. The equipment can be supplied as either simple, easy-to-install packaging stations or as complete system solutions that completely automate the total end-of-line packaging and handling function. **SOCO SYSTEM** supplies and serves its customers through a world-wide network of subsidiaries and authorised dealers, that combines a global presence with local contact, consultancy and customer service and support.
