

CAPE to Exhibit at EskoArtwork Worldwide User Conference

Dallas, TX (April 2, 2011) – CAPE Systems Group, Inc., a leading provider of software technology & consulting services for packaging design, pallet optimization, truck loading, and supply chain optimization, and tools for enhancing sustainability initiatives, today announced that it has been invited to Exhibit at the EskoWorld 2011 PartnerZone, to be held April 17-20, in Phoenix, Arizona.

The Conference is an opportunity to demonstrate to EskoArtwork customers how the CAPE products integrate with the EskoArtwork hard and software. Brad Leonard, VP, CAPE Systems, comments, “We continue our joint technology development between CAPE and Esko and our latest release of CAPE v2.11 includes four new use case interfaces with Esko, enabling packaging converters and Brand Owners to seamlessly send packaging information back and forth between both programs, streamlining the design & production process, reducing errors and overall time-to-market. We are very pleased with our ongoing development activities with EskoArtwork. They are one of CAPE’s most dynamic technology business partners.”
